

Massimo Ginella
CS24 Elementary Computer Organization
Week 04 Lab Hours
Lab time: 5 Hours

- Began tinkering with various RISC-V instructions & reviewed notes from class out loud for about an hour.
- Received an Arduino kit and began reading about all the parts in the kit as well as their functionalities.
- Practiced some more RISC-V instruction conversions into binary because I think they're fun.
- Watched some videos on fun Arduino projects that I may want to try in the future. Here's a link to one of the videos I watched.
